Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 39-42, 44-46 and 66-67 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The new claim language “without removing the collection surface from the device” is new matter. Applicants’ point to figures 26, 28 and paragraphs[0316-0313] of the PG-PUB document to support these limitations. It is clear the above portions of the original specification teach depositing the particles on the collection surface. However, there is no positive teach that would obviate the removal of the collection surface removal. The Office has reconsidered the instant claim language “without removing the collection surface from the device” and believes the above claim language is a negative limitation and is not supported by the original specification. The Office maintains the original specification does not actually state or teach “without removing the collection surface from the device” and these limitations are new matter.

Allowable Subject Matter

Claims 57-62 are allowed.

The following is an examiner's statement of reasons for allowance: In addition to the remarks of record, the cited prior art fails to teach or suggest the claimed structure that includes a prime mover.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed 9/4/08 have been fully considered but they are not persuasive.

With respect to the argument traversing the 35 USC 112 first paragraph rejections, the Office has not been convinced by Applicant's remarks for the reasons of record above.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
